The Wellbore Stability Specialists

# Turbo-Hib O2

Corrosion Inhibitor & Oxygen Scavenger, 2in1

## DESCRIPTION

Turbo-Hib O2 is an aqueous quaternary amine corrosion inhibitor/oxygen scavenger that is effective against all types of corrosion including corrosion resultant to sweet (CO<sub>2</sub>) and sour (H<sub>2</sub>S) gas. Turbo-Hib O2 forms an amine/bisulfite film on metal surfaces and prevents corrosion during drilling operations where change in pressure and temperature accelerate the corrosion of drill pipe.

## TYPICAL PHYSICAL PROPERTIES:

- Appearance: Dark Brown Liquid
- Density: 8.18 ppg  
Specific Gravity: 0.982
- Solubility in Oil: Dispersible
- Solubility in water/glycol: Soluble/Soluble
- Flash Point PMCC: >126F

## RECOMMENDED TREATMENT:

**Normal** : Recommended treatment is by batch or continuous addition into water lines and pipelines. It may be added to mud pits, side stream for treating pumping wells, and by chemical or capillary tubing for treating flowing wells. Add to injection gas to protect gas lift wells. Can be added undiluted or diluted in water, alcohol or glycol.

**HANDLING:** Turbo-Hib O2 is available in 5 gal pails, 55 ga drums and 275 ga tote quantities.

## DRILLING FLUID ADDITION COMPATIBILITY:

Turbo-Hib O2 is compatible in a variety of fluids.

## Applications:

- ✓ Drilling Fluids
- ✓ Disposal Water Systems
- ✓ Produced Water Disposal Systems
- ✓ Casing-Tubing annulus protection in producing or injection wells.
- ✓ Completion Fluids
- ✓ Brine Storage Facilities & Oil Production water injection systems.
